

AI - The Five Stages of Grief

Dr. Robert Schadek

DConf 2026

The Original Plan

- Go through the stages of grief
- Denial, anger, bargaining, depression, and acceptance
- Explain how this affected me
- Connect this to D and hopefully also help other people with the adjustment
- Profit

It can't do what I do, therefore I don't have to engage or care.

How dare people say it can do what I do.

Maybe it can do parts of what I do.

Depression

What I can do is now pointless.

Acceptance

I can do more things now.

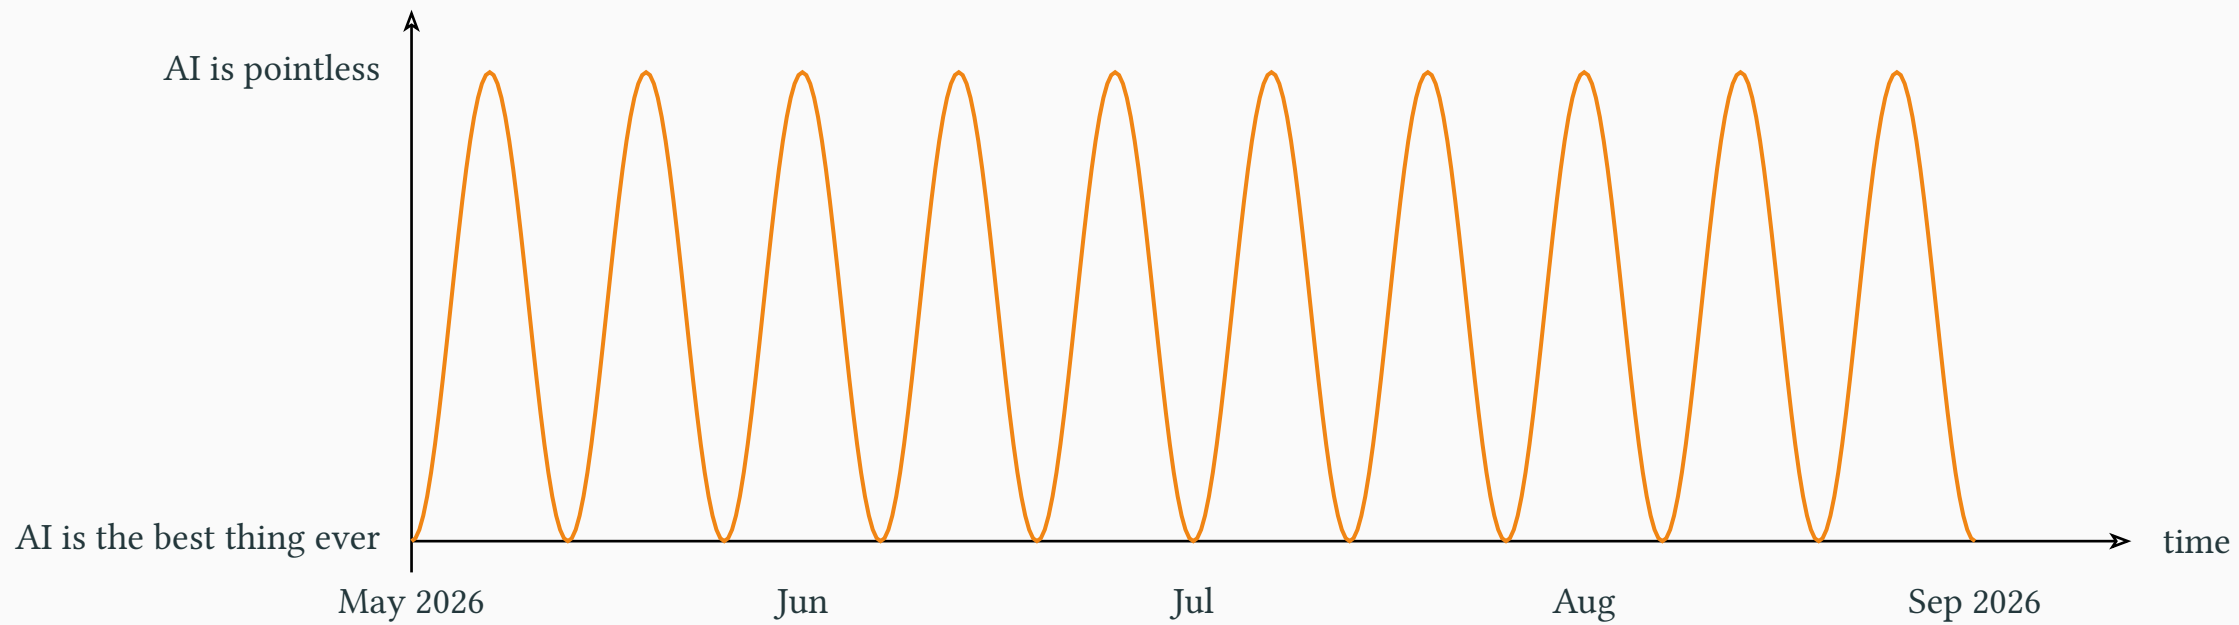

The Original Plan

- But that feels like ages ago now

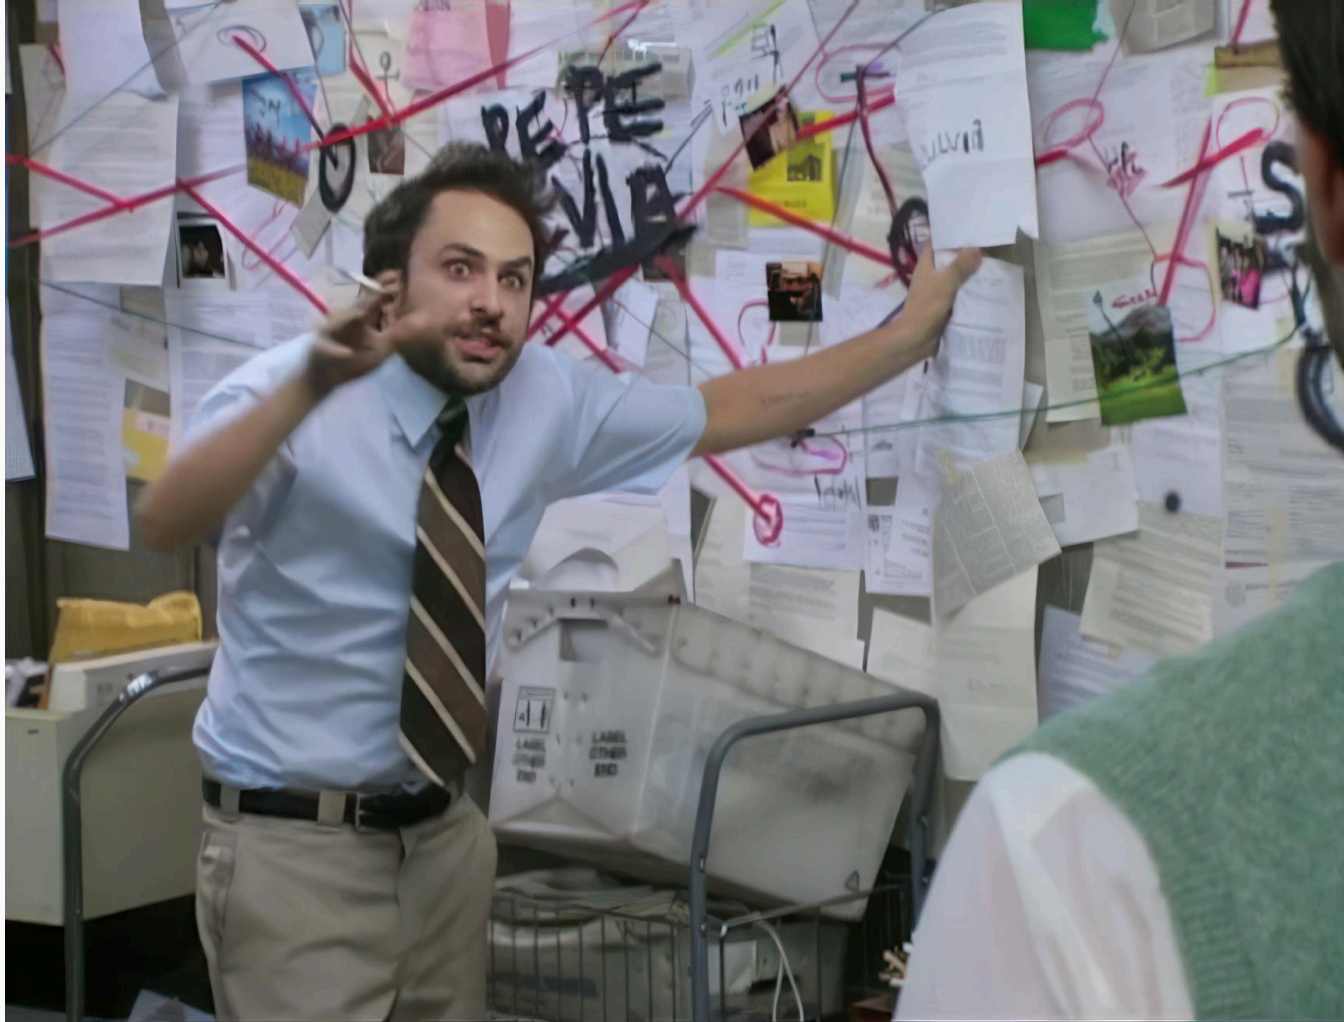

The Original Plan

- But that feels like ages ago now
- I created the proposal back in May
- To me it feels like my understanding of the world has changed every other week

My feels over time

I got a theory

Proof by proverb

- Until you have thought the computer, you don't know what it is you're trying to do.
- The user doesn't know what they want.

Proof by proverb

- Until you have thought the computer, you don't know what it is you're trying to do.
- The user doesn't know what they want.

- If you ask the LLM to do something, you have become the user, who doesn't know what you want.

Turning this into math

$$O = F(I)$$

O = the output of the program

I = the input to the program

F = the actual program

Turning this into math

$$O = F(I)$$

O = the output of the program

I = the input to the program

F = the actual program

$$O \in [0, 1]$$

$$I \in [0, 1]$$

$$F \in [0, 1]$$

- Something that is made of many parts and yet is somehow more than or different from the combination of its parts
- $O * I * F > 1$

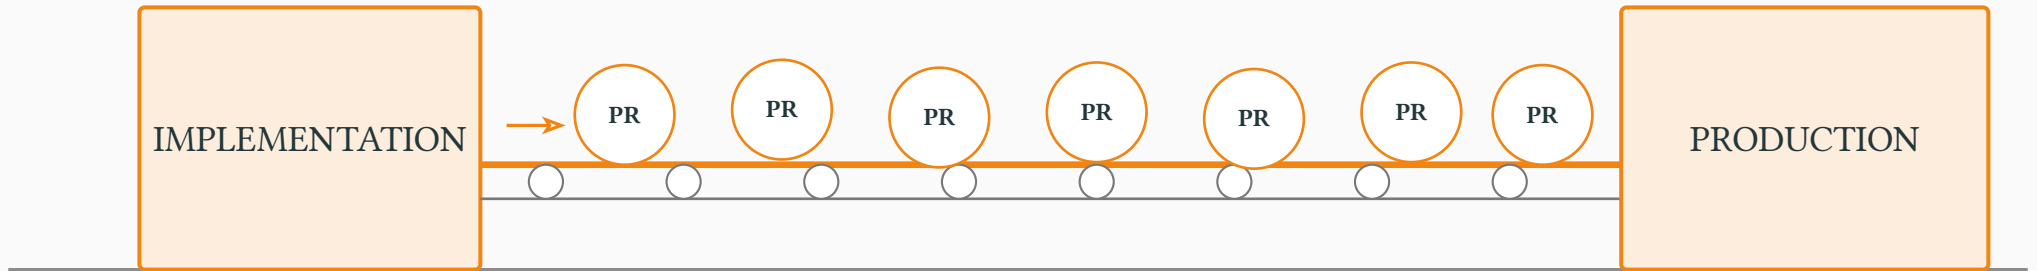

Our old Pipeline

AI Enhanced Pipeline

AI Enhanced Pipeline - Most Enhanced

Small targeted changes are pointless ...

- ... without the understanding of the Gestalt of the project

Google 2019 -- How Google search became bad

1. Missed ad growth target for search in 2019 (market saturated)
2. Make search worse so people stay on Google longer [1]

Google 2019 -- How Google search became bad

1. Missed ad growth target for search in 2019 (market saturated)
2. Make search worse so people stay on Google longer [1]

Nobody has done that to AI yet – so search away while you can

- Hoover power race in the early 2010s [2]
- EU regulation [3]
- Actual vacuum performance skill good with 700W [3]

AI Interlude - Vacuum Cleaver (Hover)

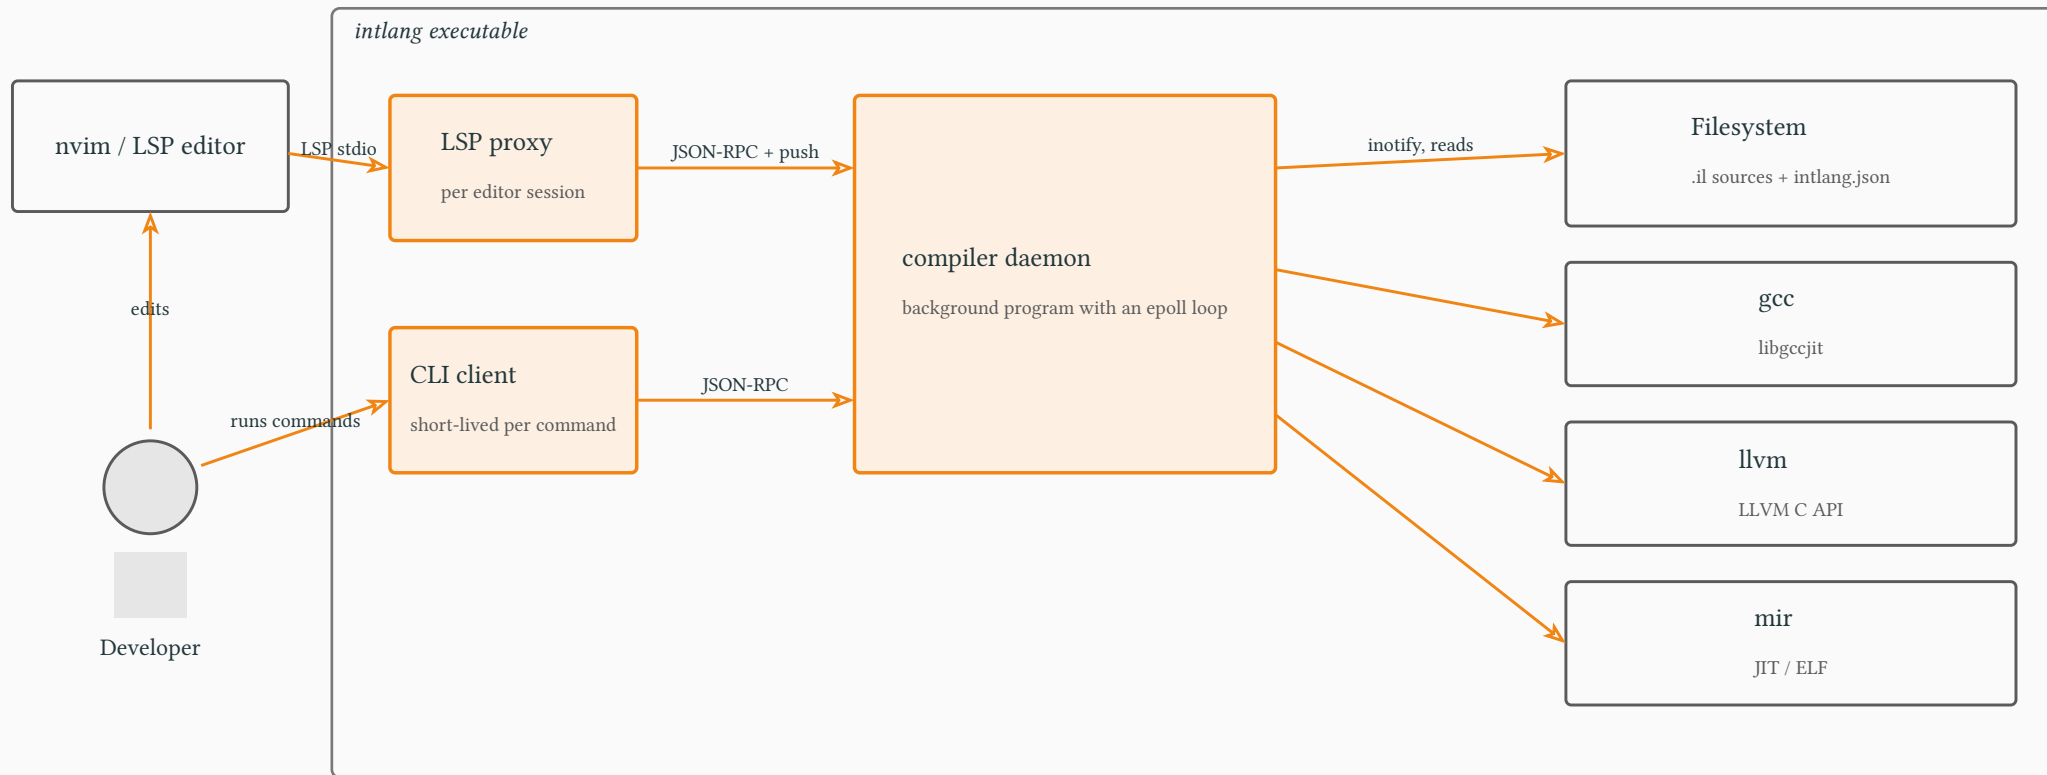

- Hoover power race in the early 2010s [2]
- EU regulation [3]
- Actual vacuum performance skill good with 700W [3]

without AI I would have never learned about this

- Compiler daemon that feeds LSP and code generation from the same cached intermediate results

- Only ints, functions, if, else
- libgccjit backend
- Not even Turing complete

intlang compiler daemon architecture

<https://github.com/burner/intlang>

- I should feel happy about intlang

- I should feel happy about intlang
- But I feel nothing – for the AI written part

- AI turned my LaTeX slides into Typst slides within minutes

- AI turned my LaTeX slides into Typst slides within minutes
- Except the pause command didn't work

- AI turned my LaTeX slides into Typst slides within minutes
- Except the pause command didn't work
- Turns out Typst has a few slide packages – seeing a pause command in LaTeX obviously means to use a package that doesn't support it

- AI turned my LaTeX slides into Typst slides within minutes
- Except the pause command didn't work
- Turns out Typst has a few slide packages – seeing a pause command in LaTeX obviously means to use a package that doesn't support it
- The compile time improvement is awesome

Walking in somebody else's shoes

- Imagine you're a non-technical person – and I tell you I can't give you an estimate because I haven't understood the Gestalt

Walking in somebody else's shoes

- Imagine you're a non-technical person – and I tell you I can't give you an estimate because I haven't understood the Gestalt
- If you don't believe me –

Walking in somebody else's shoes

- Imagine you're a non-technical person – and I tell you I can't give you an estimate because I haven't understood the Gestalt
- If you don't believe me – best case you think I'm full of 🍌

- I wish I had the answer – I don't – I think nobody does
- What does this mean for D?
- What does this mean for me and you?
